

Big sound. Small space.

As home theater moves upstairs into multipurpose living rooms, the need for refined, clean reproduction of low frequencies becomes extremely important. At less than 4" deep, Leon's ground-breaking Aaros 8" subwoofer redefines the possibility of large bass from a small enclosure. Soundly constructed to prevent unwanted resonance, this in-wall subwoofer is ideal for Living Space Theater applications where no floor space is available for a traditional sub. With color-matched perforated metal or fabric grills, and paired with Leon's 1,000 watt subwoofer amplifier, this sub stands out by blending in.

- Shallow cabinet design is less than 4" deep to fit into any in-wall application
- Paired with Leon's 1,000 watt Class A/B amplifier for extreme audiophile-grade bass production
- Custom painted metal or fabric grills available to match any color
- Fully-sealed enclosures produce tight, accurate bass response

L3-1K 1,000 watt Class A/B rack-mount amplifier

Leon's 1,000 watt Class A/B subwoofer amplifier delivers the power, refinement and flexibility that Leon's Aaros A3-IW subwoofer deserves. The amplifier naturally reproduces tight musical tones necessary for critical two-channel listening, and effortlessly controls the impact of the most demanding movie tracks. For a truly flexible solution, the L3-1K subwoofer amplifier offers adjustable crossover, variable phase, and tunable EQ, allowing installers to tailor the sound of the sub to match any room.

A3-IW

Cut-out dimensions: 14" (w) x 12" (t) | Flange/Grill dimensions: 17.5" (w) x 13" (t)

Model ID	Driver Size and Description	Power	Ohms	Frequency
